What is the MSA Profile?

MSA stands for Metropolitan Statistical Area. *The MSA Profile* download includes more than one thousand spreadsheet data files with historical data from 1970 or 1990 and projections to 2060 for population, income, employment, households, and retail sales. There are data tables for the U.S., and all regions, states, MSAs and Core Based Statistical Areas. These data tables, as well as a pdf file of the legacy printed book, are available by download. *The MSA Profile* is updated annually, costs \$495 by download, and also includes:

Comparative Historical Data for unemployment, number of business establishments by industry, and educational attainment, as well as useful calculations.

Ranking Tables of MSAs and states based on historical and projected data. There are 48 ranking tables, including employment rates of growth, income per capita, and population change.

Technical Description of the projection methods, data sources, and data definitions.

Analysis of the Regional Projections highlighting emerging trends and presenting an outlook for regional economies. This chapter also discusses the outlook for the U.S. economy as a whole.

A Valuable Resource for Market Analysts, Researchers, and Planners

Regional Market Analysis – economic and demographic data help marketing professionals and market researchers to analyze the makeup of the economy, including income and employment growth, population changes, households, and retail sales potential.

Research and Reference – historical and projected data in one printed volume enable researchers to assess economic and demographic trends quickly; many different data sets in one source make it a valuable reference tool for any business, college or public library.

Long Range Planning – annual projections to 2060 aid planners in performing studies and preparing analyses.

Customized Presentation of Data – with the spreadsheet data files in the download, and using your own software, you can tabulate data, graph trends, and create maps.

Metro Area Forecasts to 2060

Woods & Poole county projections are updated annually and take into account specific local conditions based on historical data from 1969 to 2021; all data from 2022 to 2060 are projected. Although not an indicator of future accuracy, the average absolute percent error for Woods & Poole's 10-year total population projections has been $\pm 5.5\%$ for MSAs and $\pm 3.9\%$ for states.

Available by Download

The download contains a pdf file of the legacy printed book, a separate spreadsheet file for each geographic area in the *MSA Profile* as well as a separate file for each of the 122 variables listed on the previous two pages. Spreadsheets for Micropolitan Statistical Areas and Combined Statistical Areas are also included in the download; more than one geographies in total. The computer-readable files enable you to analyze the data in most spreadsheet, database, or mapping software. In addition, **annual data** through 2060 are provided in the download.

Woods & Poole Economics, Inc. is small, independent, firm that specializes in long-term county economic and demographic projections. Woods & Poole's database for every county in the U.S. contains projections through 2060 for more than 900 variables. Woods & Poole has been making county projections since 1983.
